Marseille, France

Senior product designer and UX researcher, hands-on across research, design and delivery, with experience mentoring designers and researchers, and leading cross-functional teams. I design complex, data-heavy products for non-technical users, from enterprise tools to consumer platforms. Now I focus on how AI changes the way products should work, making its reasoning and limits visible so users can understand, use, and trust them to achieve their goals.

SKILLS

Research & Human Factors

Mixed-Methods Research · Usability
Testing · Heuristic Evaluation · Cognitive
Load & Mental Models

LLM Integration · Human-AI Interaction
Design · Conversational & Voice UI

Leadership

UX Strategy · Team Leadership ·
Stakeholder Management · Mentorship

Tools

VSCode/Claude · Figma · Sketch ·
UserTesting · SPSS · React ·
HTML/CSS/JS

LANGUAGES

English: Native

French: B2

EDUCATION

MS Human Factors (Bac +5)

Missouri Western State University 2011

BS Psychology (Bac +3)

Iowa State University 2009

WORK EXPERIENCE

vraifactors | Independent Full-Stack Product Designer May 2025 - Present

- **vraifrench.com** French pronunciation training that scores each spoken word against phonetic rules and explains every miss. In pilot with an instructor and their students.
- **tauthinking.com** school-controlled AI chat that makes student thinking visible to teachers via an agency framework and turn-level pattern detection. In pilot with two US schools.

Allstate | Sr. Product Designer (Consultant) May 2023 - Dec 2024

- Led Apple/Google Pay integration with platform liaisons, payments engineering and legal: 92% transaction success, 50% fewer steps.
- Redesigned the messaging and alert system, increasing engagement by 7% and improving payment and enrollment KPIs.

Meta | Sr. UX Researcher (Consultant) Jan 2023 - May 2023

- Identified findability as the top usability issue for 52% of sellers (unmoderated test, n=33) and prioritized the IA/UI redesigns that followed.
- Improved SFI email capture adoption by finding seller hesitations in moderated testing and turning them into UX fixes: +0.63% GMV, 16% lower churn.

Terakeet | UX Manager | Assoc. Director May 2020 - Dec 2022

- Built the UX department from the ground up - hired and managed a team of 12 - embedding design-thinking and research across client and product teams.
- Created a new CRO service line from scratch, extending the agency's offering and bringing UX methodology into fintech client engagements.

Cigna | Sr. UX Designer & Team Lead Jan 2019 - Mar 2020

- Led UX strategy for Cigna's data 360 reporting tool, letting non-technical users build their own reports and cutting a multi-day team process to one person in a day.

Google | Sr. UX Designer (Consultant) Jan 2018 - Jan 2019

- Researched, redesigned and tested Google Ads Editor for enterprise advertisers: fewer clicks and less mouse travel on bulk tasks, with no slowdown for power users.
- Led the update of Google Ads' alert and notification framework, from problem definition with engineers and stakeholders through research, testing and design, adding notification types aligned with the existing alert hierarchy.

Havas Life | Principal/Director of UX Mar 2012 - Mar 2017

- Led UX across multi-brand digital platforms as designer, developer and project manager; grew digital business to over \$40M annually.
